

Bernalillo County

Tiny Home Village Project

Three Level Security Plan

The initial community Tiny Home Working Group and in community meetings held in 2017, security of the proposed Tiny Home Village for both village residents and surrounding neighborhoods was a concern. In order to address potential security issues, a security plan consisting of three elements is included in the operations of the village:

1. Village resident volunteers are on duty 24/7 restricting entry of non-scheduled visitors
2. Bernalillo County will contract with a private security firm to call in case of emergencies
3. Bernalillo County will build an on-going relationship with APD and the Bernalillo County Sheriff's Department to provide backup as appropriate

In addition to the above security measures, good neighbor components are included into the internal structure of the village. An assigned village resident acts as a liaison to surrounding neighborhoods and neighborhood associations to address concerns. The Village Advisory Board includes a neighborhood(s) representative to maintain effective communication between each of the entities and to problem solve issues that may arise. In conjunction with village management staff, the liaisons from both the village and the community develop proactive meet and greet and mutual aid work party events to facilitate community relationship building and education.
